SEALCO SASH - SEAL

Sash-Seal is a (Patent Applied) spring device designed to improve the seal of a sash at the hinged side of a window.

It consists of 1 nylon moulding and 1 spring steel component designed to universally fit all 13mm and 17mm stack height systems.

The simple act of closing the window causes the unique Sash Spring to push against the Frame Wedge to ensure an efficient seal.

**Universal** - fits any window that uses standard stays.

**Universal** - accommodates almost all the current easy-clean and egress stays available.

**Universal** - solution for Timber, Aluminium and PVCu frames.

**Universal** - one spring steel component with either 13mm or 17mm nylon wedge.

**Benefit** - saves call out costs to leaking casement windows.

**Fitting Instructions**

Locate the components on the stay fixing area as shown in both diagrams.

This position is a universal fixing point and will enable the **Sash Seal** to be used on all PVCu systems, Aluminium systems and Timber frames.

One **Sash Seal** set will give adequate seal if fix centrally on the hinge stile.

**Part Numbers**

- Sash Spring : SS01
- White Wedge 13mm : SS02
- Black Wedge 13mm : SS03
- White Wedge 17mm : SS04
- Black Wedge 17mm : SS05
